

CRUTCHES

- Bailey Crutch

The dynamic of this crutch propels you as you walk. Made of three layers of wood strengthened from the handles up. One of my customers uses them while climbing mountains. They come straight, single spiral (shown here), or double spiraled.

- Curly Crutch

Fully laminated of 3 different colors of wood and made to fit; these crutches have a curly bottom section.

- Canadian Crutch

Laminated with 3 different color woods, can be straight, single spiral, or double spiraled.

The arm band is formed by bending 3 layers of Cherry and lined with leather.

The band flips up and down for convenience. Single Spiral (shown here).

- Mirrored Canadian Crutches

As you can see, one pair becomes two by shifting the crutches to the other side,

one pair for daytime, one for night. Available in Straight, Single Spiral, Double Spiral (shown here),
